

Goldenrod, 1938

WAGL-213

Any of numerous chiefly North American plants of the genus *Solidago*, having clusters of small yellow flower heads that bloom in late summer or fall.

Builder: Dubuque Boat & Boiler Works, Dubuque, Iowa

Length: 103' 6"

Beam: 24'

Draft: 5' 9"

Displacement: 193 tons

Cost: \$115,375

Commissioned: 2 June 1938

Decommissioned: 26 May 1973

Disposition: Transferred

Machinery: 2 Fairbanks-Morse diesel engines, 150 horsepower each; twin propellers

Performance & Endurance:

 Max: 10.5 knots

 Cruising: 8.0 knots; 1,000 mile range

Deck Gear: Steel boom, 2-1/2 ton capacity; electric hoist; 2 spuds

Complement: 15

Armament: None (small arms?)

Electronics: GRM detection radar (1965)

Tender History:

Goldenrod was one of two *Goldenrod*-class river tenders. These 104-foot river tenders were constructed of steel except for the top of the pilot house and Texas deck, which were wood. Their propellers were mounted in tunnels for operations in shallow waters, the first tenders so equipped. In the early 1960s, she and her sister, *Poplar* (WAGL-241) received new engines, 2 General Motors diesels, as replacements for the Fairbanks-Morse they were originally equipped with. They were designed to push a work barge ahead of them.

She was assigned to the 9th District and was based out of Kansas City, Missouri and serviced aids to navigation for 446 miles of the upper Missouri River, Sioux City, Iowa to Boonville, Missouri. In June, 1943, she evacuated flood victims from Missouri and Illinois.

On 13 September 1950 she was transferred to Peoria, Illinois. In February 1961 she was used to train South Vietnamese officials. From 1 August 1962 until 26 May 1973 she was stationed at Keokuk, Iowa. She assisted in flood relief near Keokuk in late April, 1965. On 3 May 1965 she assisted in flood relief near Niota, Iowa. In mid-May 1969 she assisted following a large fire at La Grange, Missouri.

She was decommissioned on 26 May 1973 and was transferred to the National Science Foundation on 26 September 1973.
